

Lynk Litepaper

Version 1.3

Contents

- Lynk Protocol
- LynkPay Network
- BluX

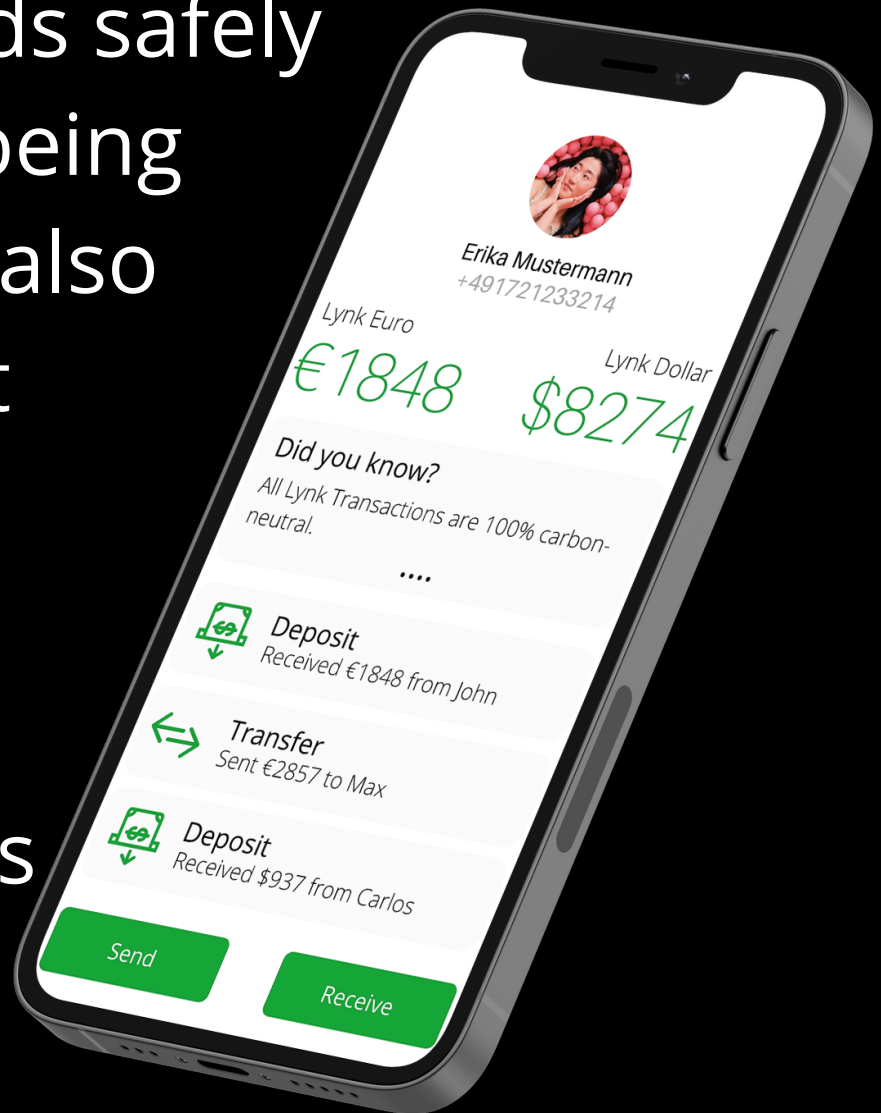

Lynk Protocol

The Lynk Protocol is a Blockchain protocol that allows Websites to connect to a decentralized Blockchain and make the Website more secure and faster due to the nodes in the Blockchain. The Lynk Protocol works by directing the Nameservers to the Lynk Routing Servers. The Servers then forward it to the nodes, that process the request and send the data back to the requester/user. Using this system, security and decentralization of the website can be ensured.

LynkPay

LynkPay is an Ethereum Layer 2 Solution, that allows Users to send and receive funds safely and fast whilst being cheap. LynkPay also allows for Smart Contracts, thus allowing for decentralized financial services such as defi Exchanges or staking platforms. Possibilities are endless.

BluX [Pron.: Blue Ex] is a blazing fast Block Explorer mainly created for the LynkPay Chain, but it is also compatible for Blockchains such as the xDai Chain or the Ethereum Mainnet.

As for default, BluX was created for LynkPay to allow for efficient tracking of the Blocks and Transactions. BluX is efficient, fast and features an easy to use Interface. With many features, BluX is also suitable for professionals and Blockchain analytics or Data Scientists.

Lynk Token

The Lynk Token is the official utility token by Lynk. The Lynk Token governs the Network and the services whilst allowing to add value to the Lynk Company. Token Holders can benefit by cheaper fees, priority services and more exclusive benefits.

Specifications

Name: Lynk

Ticker: LYNK

Contract Address:

0xdfb3fcec40cf009933c6eca4717c073
147e39604

Decimals: 18

Network: Polygon Mainnet

Further Information

Liable for the Information provided in this Document is:
